## Wireless Plus

MOBILE DEVICE STORAGE
Data Sheet

## Seagate Wireless Plus, mobile storage you can access without wires or Web

With Seagate® Wireless Plus, you can enjoy your media and access your files without wires or the Internet. This mobile storage device creates its own Wi-Fi network, so you can wirelessly stream your media and files to your tablet or smartphone on the go and off the grid. You can even bring your files stored on Dropbox® or Google Drive with you. Easily synchronise your cloud files to your Wireless Plus and access them even when you are not connected to the Internet. The free Seagate Media app available for iOS, Android® tablets and smartphones, Kindle Fire and Windows® 8|RT tablets and computers makes it easy to navigate and enjoy content wherever you go.

Forget about having to choose which files to load onto your tablet or smartphone before a trip. Bring it all with you! Wireless Plus comes with 500GB, 1TB or 2TB of built-in storage, which means you can load hundreds of movies or thousands of songs, photos and documents.¹ Simply drag-and-drop to load files wirelessly from your PC or Mac® computer or use the USB 3.0 adapter to load files up to  $10 \times 10^{-5}$  faster than Wi-Fi N.

Wireless Plus allows up to eight tablets and smartphones to access and store content at the same time. Leave it in your bag, set it on the table, place it anywhere in the car - with a range of up to 150 ft, you'll never feel tethered to your storage. Best of all, by creating its own Wi-Fi network, there is no need for an Internet connection, and you don't have to use your data plan.

<sup>1</sup> Quantitative usage examples for various applications are for illustrative purposes. Actual quantities will vary based on factors, including file size, file format, features and application software.

Navigating your media library is simple with the Seagate Media app. Sort through large media libraries with cover art, metadata, filters, keyword search, folder and media views. Download films and other media to your device, so you can enjoy your content later, when not connected to Wireless Plus. When you need more storage capacity on your smartphone or tablet, you can easily off-load photos and videos from your device's camera roll by uploading them to your Wireless Plus

At home, Wireless Plus can stream media to your TV too. Game consoles, smart TVs, connected Blu-ray players and other DLNA devices can access the content on Wireless Plus

storage device using the Seagate Media app.

whenever you have it connected to your home network via Wi-Fi. If you have an Apple TV®, your iPad, iPhone and iPod touch can use AirPlay® to take your media from small screen to big screen. Additionally, with Samsung Smart TVs, Blu-ray players and select streaming players, you can directly install the Seagate Media app and experience your content with an interface optimised for living room viewing and easy remotecontrol navigation.
