Savvio 15K

2.5-inch enterprise hard drive

**15K RPM • 73 GB and 36 GB •
3-Gb/s Serial Attached SCSI**

Key Advantages

- The Seagate® Savvio® drive is 70 per cent smaller than 3.5-inch 15K drives and enables cooler, faster and much more reliable systems.
- The Savvio 15K drive is the fastest drive available anywhere. In addition, the Savvio 15K drive's smaller size enables more drives per system, increasing system performance density and allowing sufficient memory in the system to match faster processors.
- The Savvio 15K drive has the highest reliability in the industry and the best nonrecoverable error rate to safeguard data.
- The Savvio 15K drive consumes less power than 3.5-inch 15K drives, runs cooler and enables more airflow to cool processors.
- The Savvio 15K drive meets IT performance needs in less space and with fewer drives than 10K drives, lowering TCO.

Best-Fit Applications

- Email/collaboration
- File and print
- Database
- Transaction processing
- Rack and tower servers
- Blade servers
- Storage arrays
- Space-constrained specialty applications

Savvio 15K

2.5-inch enterprise hard drive

The Savvio 15K drive provides faster performance than 3.5-inch 15K drives while consuming 30 per cent less power.

Fastest Drive Anywhere

- 10 per cent faster than 3.5-inch 15K drives and 35 per cent faster than 2.5-inch 10K drives
- 70 per cent smaller than 3.5-inch drives, enabling integration of more drives into smaller, more space-efficient systems to deliver higher performance per U
- Allows room for more memory to further increase system performance
- Provides the performance needed for virtualization and high-access applications

Cooler

- 70 per cent smaller than 3.5-inch drives, enabling more airflow to cool processors
- Requires at least 30 per cent less power than 3.5-inch 15K drives, while performing faster—highest performance per watt of any drive
- Lower power consumption creates less heat, lowering system temperatures and reducing cooling costs.

More Reliable

- Highest reliability rating of any drive
- Industry's best nonrecoverable error rate to safeguard data
