The inclusion of the Partners' products on this interoperability list is not a guarantee that they will work with the other designated storage products. In addition, not all software and hardware combinations created from compatible components will necessarily function properly together. The following list includes products developed or distributed by companies other than Seagate. Interoperability information concerning Partner products was obtained from the suppliers of those products. Seagate cannot confirm the accuracy of performance, compatibility, or any other claims related to these products. Questions about the capabilities of non-Seagate products should be addressed to the suppliers of those products. This information is for planning purposes only; any use of the information contained herein is at the user's sole risk.

For support issues regarding non-Seagate products, please contact the manufacturer of the product directly. This information could include technical inaccuracies or typographical errors. Seagate does not assume any liability for damages caused by such errors as this information is provided "as is" for convenience only; readers use this information at their own risk and should confirm any information contained herein with the associated vendor.
