

Seagate® GoFlex Satellite™

Mobile Wireless Storage

Carry your media library with you while on the go and wirelessly stream to your iPad® or Android® tablet.

GoFlex Satellite™ mobile wireless storage allows you to carry your media library with you while on the go and wirelessly stream videos, photos, music and documents to your iPad®, Android tablet or smartphone. The GoFlex Satellite device includes a fast USB 3.0/USB 2.0 connection and downloadable Media Sync software to transfer media and documents easily from your PC or Mac® computer. The GoFlex Satellite device can store over 300 HD movies*, so you'll never have to worry about running out of space on your tablet or smartphone.

Perfect for when you need to:

- Take your media library with you on the go and stream it to your iPad®, Android® tablet or smartphone
- Share media with up to 3 Wi-Fi enabled devices at the same time

After you load your media on the GoFlex Satellite device, it can be streamed to your tablet or smartphone via its Wi-Fi connection, making the solution completely wireless. Leave it in your bag, put it on the table, place it anywhere in the car – with a range of up to 150ft you will never feel tethered to your storage. Best of all, the GoFlex Satellite device creates its own Wi-Fi network, so no Internet is required – take it all with you and access it wherever, whenever.

To enhance your experience even further, download the free GoFlex Media™ app for iPad®, iPhone®, iPod touch®, Android tablets and smartphones from the Apple® App store or the Android Market. The GoFlex Media app is tailored for the GoFlex Satellite device, allowing you to sort easily through your media library by Videos, Photos or Music, perform keyword searches, and use folder and thumbnail views. This app also allows you to download videos and other media from the GoFlex Satellite device, so that you can enjoy your content later when not connected, or extend the battery life of both your mobile device and GoFlex Satellite.

If you love media, it's only fair to share. The GoFlex Satellite device can stream movies and other media to almost any device that has a Web browser and Wi-Fi connectivity. If your friends and family have a smartphone, tablet or laptop, they can enjoy your media content too. In fact, the GoFlex Satellite device can stream three different movies to three devices simultaneously, so everyone in the family can enjoy their favourite content.

Additionally, the built-in battery enables the GoFlex Satellite device to be placed in standby mode, ready to serve media for up to 25 hours, and can continuously stream up to five hours of video on a single charge.

Highlights

- Carry your media library with you and stream to your iPad®, Android tablet or smartphone wirelessly
- Stream media to 3 Wi-Fi enabled devices at the same time
- Sync media and documents automatically from your PC or Mac® computer
- Up to 5 hours of battery life
