

EVault Storage Cloud

Data Protection Service for NetApp

Data Sheet

Cloud Service Highlights

- **Enable affordable, predictable data protection**
 - Reduce data protection costs by 49 percent over traditional solutions
 - Pay only for the resources you use
 - Lower total cost of ownership
- **Accelerate backup and recovery**
 - Minimize backup windows with storage-efficient, block-based replication
 - Reduce backup times from hours to minutes
 - Store files in their native format for faster backup and recovery

Protect your critical data without incurring additional capital or IT expenses

Most IT organizations agree that having a fast, reliable, and secure data protection solution in place is critical for keeping its business on the path to success. Creating an offsite backup and recovery solution can take time, resources, and expertise—all of which may be in short supply. If resource constraints are forcing you to leave data unprotected, your business could be at risk.

EVault® Storage Cloud—Data Protection Service for NetApp from Seagate® is a purpose-built cloud service, offering integrated easy, reliable and secure cloud data protection for NetApp® FlexPod® and FlexPod Express customers who use SnapVault and SnapMirror for replication. Leveraging an affordable and predictable pay-as-you-grow model with no upfront costs, NetApp FlexPod customers can achieve up to 49-percent savings over traditional onsite opex/capex solutions. Seagate makes it easy to protect your data without blowing the budget.

Enable Affordable, Predictable Data Protection

EVault Storage Cloud for NetApp eliminates upfront costs and capital expenditures while also freeing up your IT staff to focus on other more critical projects. You pay only for the resources you use. And, with NetApp deduplication technology, you'll use and pay for up to 50-percent less storage to store more data.

Accelerate Backup and Recovery

Bandwidth constraints and missed backup windows are a thing of the past with EVault Storage Cloud for NetApp. By leveraging NetApp's proven and reliable replication technology and the EVault Storage Cloud, this solution provides a highly efficient, point-in-time backup copy kept in EVault's secure data centers. Eliminate costly tape solutions, expensive deduplication backup appliances, reduce carbon footprint in your data center, and take full advantage of EVault Storage Cloud—Data Protection Service for NetApp. Backups that used to take hours can be done in minutes.

Faster backup means faster recovery. You can be certain that your data is safely backed up and ready to recover if needed. Because Seagate stores your data in its native format, recovery is fast and easy.

NetApp®

EVault Storage Cloud Data Protection Service for NetApp

Know Your Data Is Safe

Gain peace of mind knowing that your data is protected by industry experts according to the highest standards of security and reliability. Based on NetApp storage and replication technologies, data is deduplicated, compressed, encrypted, and transmitted to one of Seagate's top-tier data centers. There, the data is protected by industry-leading data protection experts 24/7/365.

Seagate's 10 geo-redundant data centers deliver at least 99.98% availability, so you can be certain that your data will be available when and where you need it. Independent SSAE 16-compliant audits, completed every year, guarantee that Seagate facilities and processes conform to the highest industry standards. EVault Reports provide instant, centralized, and accurate information about your entire backup and recovery process.

Related Services: EVault Cloud Backup Service

EVault Cloud Backup Service* backup and recovery service securely, reliably, and efficiently protects your organization's critical data, directly over the Internet with no additional capital or IT expenses. Based on NetApp storage technology, EVault's cloud-based backup and recovery subscription service deduplicates, compresses, encrypts, and transmits your data to one of Seagate's top-tier data centers where it is protected by industry-leading data protection experts 24/7/365.

About NetApp
