

Job Description

Job Title: Equipment Maintenance Technician

Reference: EMT/184129

Department: Equipment Support **Reporting to:** Equipment Technician Manager

Location: Springtown, L'Derry **Date:** October 2018

Job Summary:

The equipment technician will be responsible for maintaining thin film head equipment and processes to required parameters.

Key Responsibilities and Duties:

- Completion of preventative maintenance as scheduled on assigned equipment
- Fault finding and repair of unscheduled downs.
- Awareness of SPC on KPOV's and KPIV's monitoring.
- Record detailed and accurate information on work performed via preventative maintenance software in parallel with regular updates to the Equipment Technician Manager
- Ensure high standard of housekeeping throughout the shift.
- Compliance with health and safety policy and procedures.
- Assist with the installation and qualification of equipment.
- Assist engineering in major fault diagnosis and process variances.
- Continuous improvement of skills within the department through training and tacit knowledge transfer in the training of other Technicians
- Actively take part and support company business excellence initiatives
- Cost effective repair of faulty components in-house or ensuring offsite repair whilst highlighting and returning any non-conforming goods to stores
- Flexible to transfer to any other duties/shift considered necessary to meet the needs of the business.

The above statements reflect the general tasks, duties, activities and/or responsibilities necessary to describe this position and is not intended to set forth all of the specific requirements of the job. These job duties/responsibilities may change or vary in response to business needs.
