

Increase Capacity for On-Site NVR and Data Tiering

AXIS Camera Station is a video and access management software developed to fit a wide range of installations—from retail, hotels, and schools to manufacturing and beyond. Used in conjunction with Tiger Technology and Lyve™ Cloud, you can leverage on-premise VMS and/or hybrid cloud.

Benefits & Applications

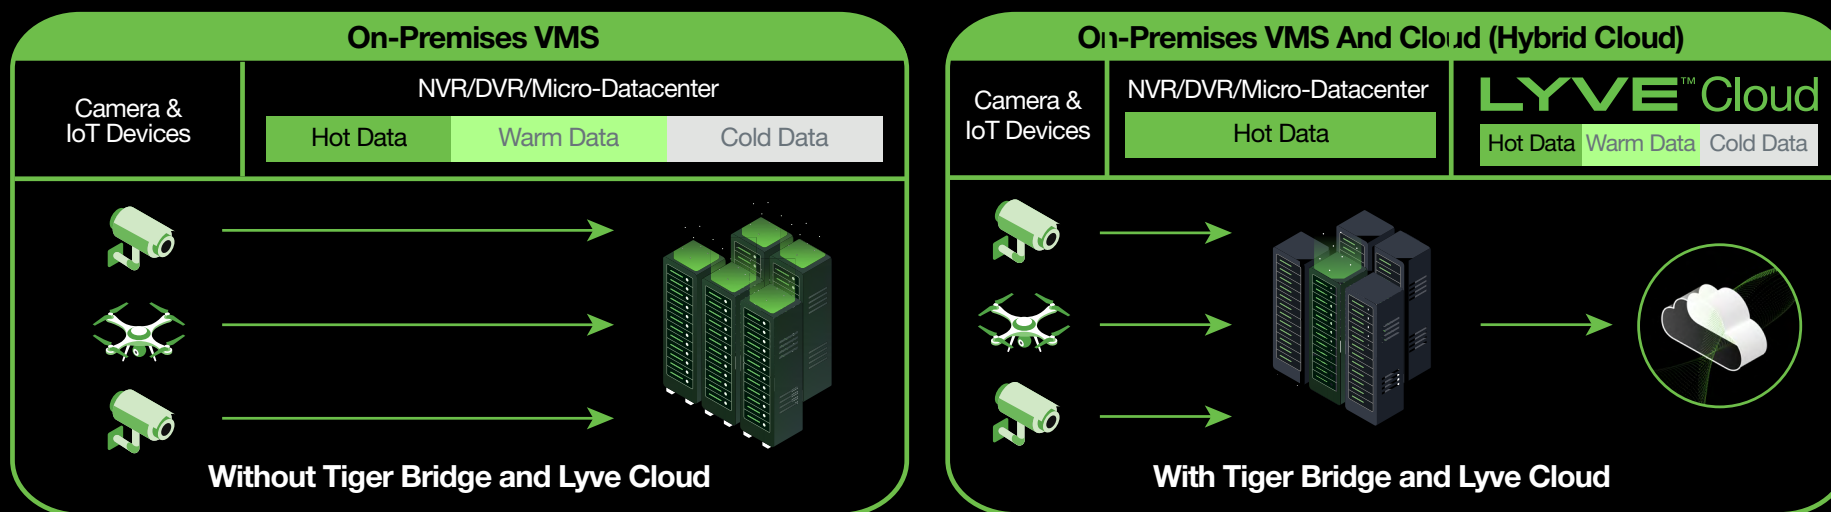

- Enhanced security and access control
- Surveillance, storage, backup, archive, cloud, and multicloud
- Remote monitoring via mobile viewing app

2023 ISC WEST PROMO

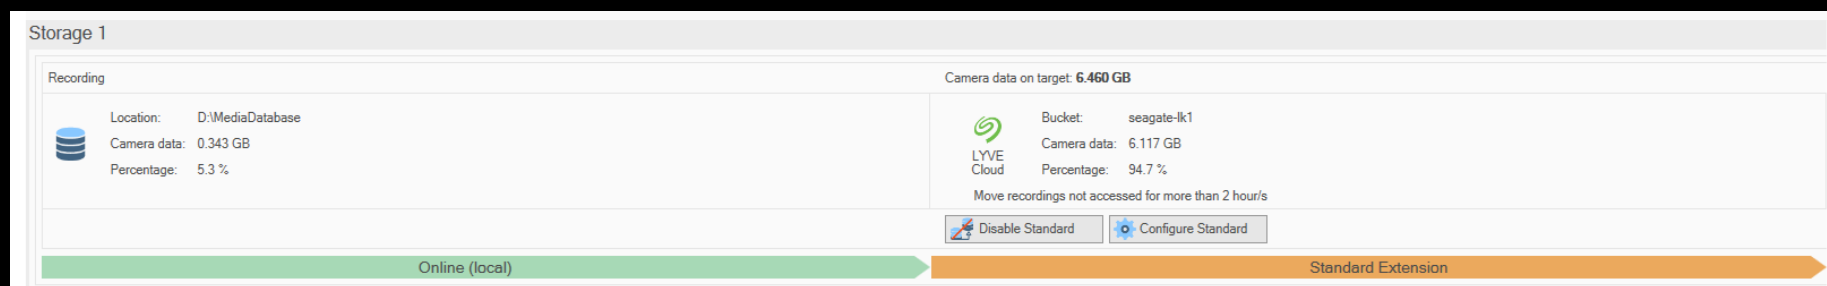

Video Storage and Analytics Solutions

Increase capacity for on-site NVR and data tiering.

Manage data to store on the primary server or the cloud
