

On-Premise to Cloud Simplified

Cloud Collect has teamed up with Lyve™ Cloud and Tiger Technology to offer Cloud Collect Bridge, a bundle solution that enables businesses to seamlessly move video data from on-premise to the cloud using existing Windows-based VMS. With enhanced data usage and billing capabilities, the Bridge bundle makes it easy to purchase and implement a powerful solution—while continuing to use the VMS GUI you already use and understand.

Benefits & Applications

- Integrates with current video management systems/GUI
- Can be used for video data or specific files/events
- Enables long-term data retention—no additional hardware investment
- Easy purchase/deployment via Cloud Collect Bridge bundle
- Set up within 5 minutes on any windows-based VMS—no downtime/reboot

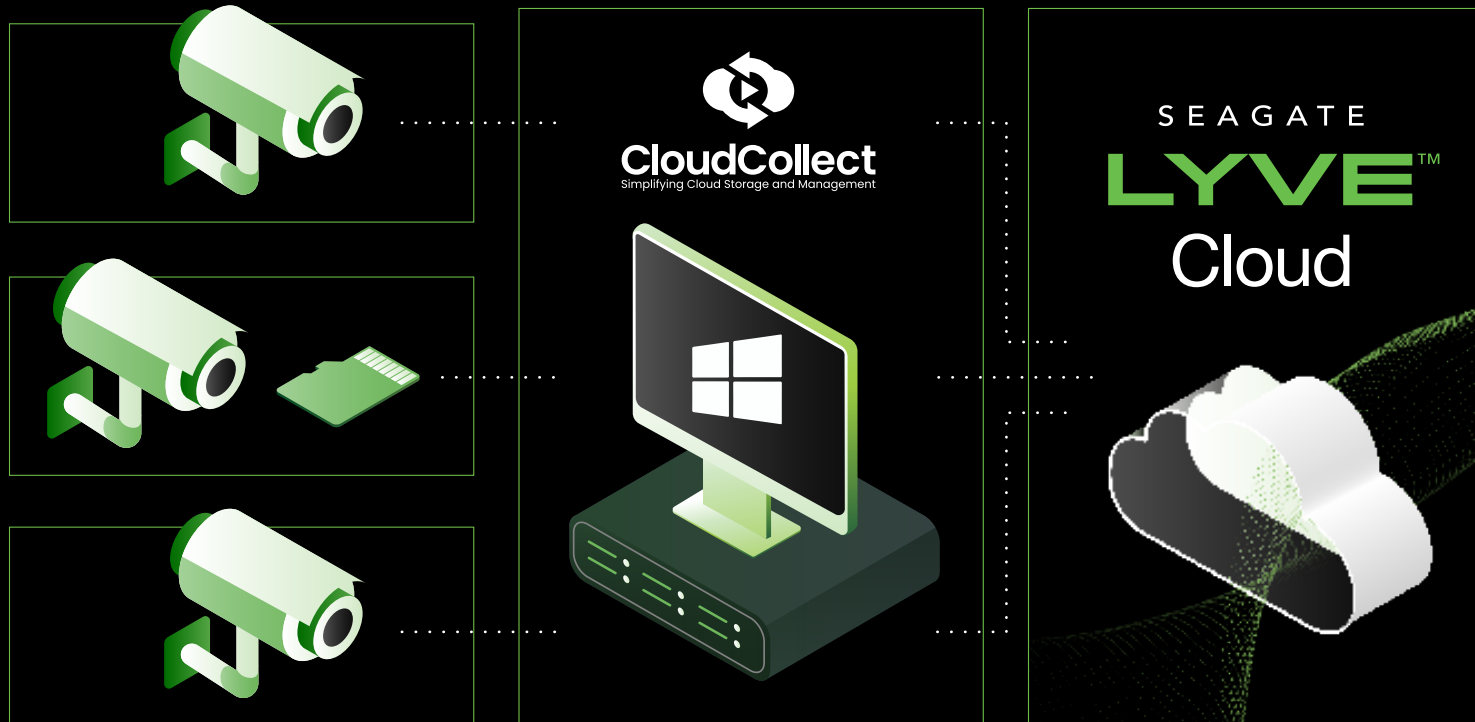

2023 ISC WEST PROMO

Video Imaging and Application Solutions

The Cloud Collect Bridge follows an on-premise first (OPF) storage model, allowing entities to leverage legacy deployed IP surveillance systems—with zero hardware replacement—while gradually migrating to cloud storage.
