VIDEO IMAGING AND APPLICATION SOLUTIONS

Future-Proof Surveillance Storage

Milestone XProtect® video management software (VMS) brings the video surveillance puzzle pieces together to create a solution that keeps people and property safe. When combined with a platform like Seagate® Exos® X 5U84, XProtect® becomes a unified security platform—an intelligent, scalable, and centralized data storage system capable of enduring performance and long-term data protection.

Benefits & Applications

- Enables scalable centralized storage for video recording
- Delivers highest protection for video data with Advanced Distributed Autonomic Protection Technology (ADAPT)
- Provide enterprise class security with Seagate data-at-rest self-encrypting drives (SED)
- Offers optimal total cost of ownership (TCO) for your storage footprint with lowest rack space, power, and cooling—allowing your VMS deployment to scale to meet growing storage needs

2023 ISC WEST PROMO

Video Imaging and Application Solutions

The Cloud Collect Bridge follows an on-premise first (OPF) storage model, allowing entities to leverage legacy deployed IP surveillance systems—with zero hardware replacement—while gradually migrating to cloud storage.

EDGE COMPUTING & STORAGE		COMPUTE & CENTRALIZED STORAGE		Data Archive
DVR	Hybrid, NVR AI, VMS Appliance	Enterprise NVR, VMS Appliance Storage Sub-System		JBOD, Archive Cold Storage
Facial Recognition, Sequential 24x7 Video Recording		Facial Recognition, Traffic Pattern Analysis, Machine Learning Workloads	Mixed Workloads	Video Archive
SkyHawk & SkyHawk AI HDD 		SkyHawk AI & Nytro SAS SSD 		SkyHawk AI 
Digital Video Recorder & Network Video Recorder 		Exos X 2U12, Exos X 5U84 		Exos E 4U106 
Consumer/SMB, Residential, Retail, SMB	Retail, SMB, Banking, Commercial	Professional - Airport, Government, Building, Commercial, Banks		Enterprise - Safe City, Artificial Intelligence, Military, Border Security
