Create Your
On-Demand
Library With—

- 25 DVD movies
- 50 hours of video
- 15,000 songs
- 15,000 photos
- 50 computer games

Summary

An *On-Demand World* requires massive amounts of affordable storage in products that fit well with our increasingly miniaturized and mobile electronics. With the shift to smaller desktop and laptop computers, it is no longer desirable to have a huge box under the desk just to provide the processing and storage necessary to manage our digital lives. Today's storage must be desktop- and laptop-friendly, and that means ever-larger capacities with an incredibly small desktop footprint.

Introducing the Seagate® 750GB Pushbutton Backup External Hard Drive, an entire library on your desk that takes up the same space as a stapler or tape dispenser. You can now create an on-demand library containing all of the following:

- 25 DVD movies
- 50 hours of home video
- 15,000 songs
- 15,000 photos
- 50 computer games

And still have enough left over to easily back up at least an additional 300GB of data from your desktop and laptop PCs.

750GB PUSHBUTTON BACKUP EXTERNAL HARD DRIVE

The world's first and smallest 750GB 3.5-inch desktop drive

Best-Fit Applications

- Securely and reliably save memories (photos, video, music, business files) for years to come.
- Add massive storage capacity to desktop and notebook computers, or archive, back up and retrieve huge amounts of data. Think of your Pushbutton Backup External Hard Drive as your storage vault for protecting and preserving critical business data.

The Seagate Advantage

The 750GB Pushbutton Backup External Hard Drives are beautifully engineered, inside and out, with state-of-the-art features and work-of-art design. They're exceptionally durable, conveniently portable and perfectly stackable.

- Safeguards valuable data for years to come
- Sleek and elegant structure dissipates heat, so they run much cooler than any other external drives.
- Hot-swappable, so you can connect and disconnect without turning off your computer. And you have the versatility of connecting via USB 2.0 or FireWire.
- Compatible with PC and Mac.
