

Sustainability Report*

Sustainability @ Seagate

Seagate is committed to sustainable storage. Our engineering focus is on increasing storage capacity and utilization, while controlling the quantity and types of materials we use and improving energy efficiency and recyclability.

Sustainable Design Features

- Highly reliable performance with enhanced caching, making it the logical choice for cloud data center and massive scale-out data center applications
- PowerBalance™ feature optimizes Watts/TB
- Maximize total cost of ownership savings through lower power and weight with helium sealed-drive design

Energy and Greenhouse Gases

Manufacturing and using our products requires energy and produces Greenhouse Gas (GHG) emissions. We assess life cycle energy and GHG impacts and work towards improving energy and GHG efficiency and reducing ownership costs with each new generation of our products. Since 2022, our manufacturing facilities have operated using 100% renewable energy.

| Power Consumption | Per Unit | Per TB |
|------------------------|----------|--------|
| Average Idle Power (W) | 5.3 | 0.3 |
| Operating (W) | 9.4 | 0.5 |
| Average Annual (kWh) | 55.8 | 3.1 |

Greenhouse Gas Emissions by Life Stage

Use Phase - Conventional Energy

- 3.1% Bill of Materials
- 3.3% Manufacturing
- 0.1% Packaging
- 0.7% Distribution
- 92.5% Use Phase
- 0.4% End of Life

Use Phase - Renewable Energy

- 27.0% Bill of Materials
- 28.8% Manufacturing
- 0.5% Packaging
- 6.4% Distribution
- 34.2% Use Phase
- 3.1% End of Life

Safer Materials

As a leading supplier to major original equipment manufacturers, Seagate helps to establish standards for direct materials – components that make up our products -- to meet customers' strictest specifications. We are meticulous about cataloging restricted substances; currently we list more than 2,000.

Scarce Resources

We aim to reduce our use of scarce resources during the life cycle of our products. We assess the water and metal depletion impacts of our products in order to minimize dependence on key natural resources and reduce manufacturing and product ownership costs.
