

Video and Video Analytics

Storage Solutions Portfolio Product Flyer

Unlock Video and Analytics with Valuable Insights from Edge to Cloud

Seagate® delivers complete storage solutions for video and analytics data.

Our full storage portfolio of video and analytics solutions are built and tested for security and surveillance. With SkyHawk™ drives for NVR, Exos® and Nytro® at the edge systems, Exos X high-performance enterprise storage systems, and our surveillance-optimized Lyve™ solutions—including Lyve Mobile edge storage and Lyve Cloud storage-as-a-service—we've created a reliable, affordable, flexible, scalable, and secure foundation to help meet the growing demand of video storage from edge to cloud.

Benefits

- **High-Performance and Optimized for Video Surveillance** that is tested with and validated by leading NVR and VMS partners.
- **Critical Video Data Protection**—from health management, encryption, and data recovery for drives to ADAPT technology on systems—your data is protected.
- **Flexible Solutions That Scale** with a wide range of drive capacity choices and systems that can deliver terabytes to petabytes quickly and efficiently using accommodating nodes of any size.
- **Lower TCO** with the industry's most space-efficient, high-density enterprise storage systems with the highest IOPS per dollar.

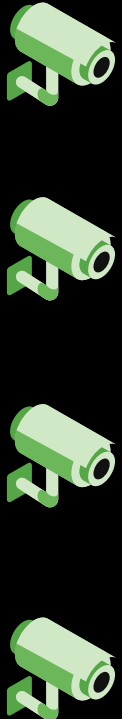

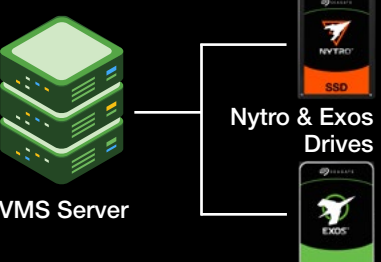

Best-Fit Environment:

- Video and Video Imaging Environments

Video Storage and Video Analytics Data Solutions

Unlock Data Insights From Edge to Cloud Solutions
