FCC CAUTION : Changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.

responsible for compliance could void the user's authority to operate the equipment. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna. Connect the equipment into an outlet on a circuit different from that to which the
- Consult the dealer or an experienced radio/TV technician for help.

This marking shown on the product, accessories or literature. Inis marking shown on the product, accessories or literature, indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of wastes and recycle them responsibly to

promote the sustainable reuse of material resources. Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling. Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

3.5" HDD INSTALLATION GUIDE

TB = 1,000,000 bytes / 1GB = 1,000,000,000 bytes / 1TB = 1,000,000,000,000 bytes

Actual accessible capacity may vary from advertised capacity due to formatting and partitioning of the hard drive, as well as due to your computer's operating system.

Avoid dropping or jarring your disk drive during as Drives include high precision mechanics, so during installation, do not stack drives on top of each other and do not drop or jar drives. Also, avoid dropping or jarring during operation.

Warranty void if any stickers or labels are removed or damaged. Never disassemble hard drives.

Protect the HDD from Electrostatic Discharge(ESD). MR Head is very sensitive in Electrostatic. Keep the HDD in their static shielding bag.

Drives include sensitive mechanics and lubricants. Please observe the operating and non-operating temperature ranges listed on product datasheets.

When installed in an external case.

Avoid dropping or jarring. Dropping a drive while in operation can cause the drive to become inoperable and the data can become un-readable, so please be careful. Avoid moving the drive while the drive is in operation.

Check the External case of Case and Case are a case of Case are a case of Case and Case are a case of Case and Case are a case of Case are a ca

External case's Grounding prevents HDD malfunction form ESD. To keep close any magnetic substance can be caused Drive data loss damage.

Configuring your Hard Disk Drive (Master, Slave)

 If your computer's m imum support level is under 32 GB:

Set as Slave (CD)

Select Cable (CD + EF)

Installation Your Hard Drive

ing mechanism and the location of the hard disk drive

- Turn off the computer, unplug the external cables. and open computer cover. Mount the hard disk drive in the designated place in the computer with screws provided with the product.
- Connect 40 pin interface cable and power cable. Make sure that the direction of the cables are correct and matches the shape of the receptacles when connecting cables. Incorrect cable connection may damage the hard disk drive.

Note: In some rare cases SATA 1.5Gb/s hosts can not establish SATA interface connection with SATA3.0Gb/s devices due to interface p ATA3.0Gb/s devices due to interface protocol is itch your drive to SATA 1.5Gb/s speed with a viding via www.seagate.com

(a) Turn off the power of your computer.
(b) Unplug the external power cables to the computer.
(c) Open the cover of your Computer.
Cover opening mechanism and the location of the hard disk drive may vary from one computer to another. (Consult your computer manual)

(d) Insert the HDD into an available 3.5" bay in your computer and secure it to computer and secure it to computer and secure it to computer and secure it.

1 Attach the SATA interface cable to the interface connector on the hard disk drive. The connector is keyed and will fit in only one way

2 Attach the power cable to the power receptor on the hard disk drive. The connector is keyed and will fit in only one way.

Check all other cable connections before turning on your computer. CAUTION!: Do not force or rock the connectors into their sockets on the hard disk drive. Push them in straight until they are seated

- Go into CMOS screen during the booting of the computer. For descriptive details of the program, refer to the computer's user's manual.
- Make the computer detect the hard disk.
 - 1) If your computer supports IDE HDD Auto Detection, the hard disk drive will
 - If your computer supports DE THE Paulo Descator, with the User Define Mode and by referring written information on the product, set the correct settings for Cylinder, Head, and Sector and if some Bios must be, set the HDD Mode to LBA.
- 3 Save the changed details and exit. 2. Partitioning and Formatting the Drive

nation can be obtained at www.seagate.com

- Q1
- 1) First, confirm whether each cable was connected correctly.
- ② Confirm whether Jumper-setting is correct.
 ③ Confirm whether BIOS setup became correctly.
- O2 Even though the HDD recognized in BIOS setup, it of
 - ① Confirm whether did correctly partition and format. ② Partition can be created through the Fdisk or Installing OS according to OS's version.

Q3 Although my drive is larger than 137GB, it is only shown as 137GB. There are two reasons of the 137GB (128GiB) capacity barrier

There are two reasons of the 137GB (128GiB) capacity barrier.

One is a hardware barrier which some motherboards do not support 48 bit LBA. The other is a software barrier which Windows2000 and Windows XP do not support larger than 137GB.

Please refer below URLs for recognizing larger than 137GB in the software barrier. For download the SP3 for Win2000:

www.microsoft.com/windows2000/downloads/servicepacks/sp3/default.asp

For editing the registry for Win2000:

http://support.microsoft.com/windows200/jovnloads/servicepacks/sp1/default.asp

For download the SP1 for Win-XP:

www.microsoft.com/WindowsXP/pro/downloads/servicepacks/sp1/default.asp

Please visit www.samsunghdd.com (Utility Dowmload) and use the Disk Manager for solving the hardware barrier.

There are two ways for setting jumpers. One is the general jumper setting for recognizing the drive's own capacity, the other is the 32GB clip jumper setting for recognizing only 32GB capacity whatever the real capacity is.lt seems that you have set the 32GB clip jumper.

ough my drive supports up to LIDMA 133, it is re

Authough my arrive supports up to UDMA 133, it is recognized as UDMA 100 Please visit www.samsunghdd.com and use the HUTIL for confirming or switching the UDMA mode on your drive if your motherboard supports UDMA-6. Because some motherboards have a problem for supporting UDMA-6(133), we set UDMA mode as UDMA-5(100) during the production. You can switch the drive's UDMA modes with the HUTIL. (HUTIL has been uploaded onto www.samsunghdd.com)

Q6 I am looking for a Software & Firmware (mainly about drivers) but I found Where I can find I want?

We don't release any firmwares. Because the product has been already optimized with its own configurations, IDE (PATA & SATA) drive does not need any drivers. You just have to make a partition and format your drive for using. Please make sure whether you had partitioned and formatted. First of all, you must partition and format for recognizing the new drive in the Windows Eveloper, Weld to Effek. Windows Explorer. Within Win98 series, please use the Fdisk.
Within Win2000 & Win-XP, please use the Disk Management.
When installing Win2000 or Win-XP, the installation process includes the
