

FreeAgent™ Go

Take your desktop environment and all of your files to go.

Why just carry your files with you? Along with up to 160 glorious gigabytes, FreeAgent Go software lets you carry lots of great programs and all your browser favorites and passwords without having to haul around your computer.

The FreeAgent Go data mover can run more than 100 free and pay-to-use applications on any PC without installing or storing programs on the host computer. Carry your browser, favorites, passwords, IM client and contacts, email client, cookies, settings and files so whether you're using a computer at work, school, a business center, an Internet cafe, or a library, you have your desktop environment there when you need it.

And not to worry, your FreeAgent Go data mover saves all of your private information on itself, not on the computer you're using. That means there's no trace of your last session to tempt the next person on a borrowed computer. It also provides strong file encryption to protect your content, and lets you sync your files from several PCs.

It's all about having your desktop environment and latest files with you - when and where you need them. Designed for mobility, the sleek compact design easily fits into your shirt pocket, briefcase or backpack. We provide the USB cable that's not only the interface connection, but the power source - no additional power cords are needed. And the unique espresso brown finish with molten amber illumination is just icing on the cake.

Plug in the USB 2.0 cable to a PC and your personal desktop environment launches automatically. To help eliminate even the slightest bit of worry, we've included technical support a five-year limited warranty.

The FreeAgent Go data mover. Now any PC can temporarily become your PC.

HIGHLIGHTS
