Seagate® GoFlex Cinema™
Multimedia Drive

Store your media library and enjoy films, photos and music on your TV

The GoFlex Cinema™ multimedia drive allows you to store your media library in a central location, so that your films, photos and music can be enjoyed easily on your TV in full 1080p HD video and crystal clear surround sound.

All Types of Media
Our media libraries can contain numerous different file types, especially when it comes to video. Thankfully, the GoFlex Cinema multimedia drive is capable of playing back almost every major media format, including MKV, H.264, AVI and MP4 to name just a few.

Upgradeable Storage
The GoFlex Cinema multimedia drive is part of the GoFlex family of storage products, making it easy to upgrade storage capacity in the future. As your media library grows, simply upgrade the removable drive in the GoFlex Cinema device to a higher capacity GoFlex® Desk drive – no tools required.

Direct Camera Transfer
For added convenience, the GoFlex Cinema multimedia drive includes a side-mounted USB port, which can be used to connect additional external drives as well as digital cameras. By connecting a digital camera to the USB port, you can instantly play photos and films from the camera on your TV, or you can copy files from the camera to your media library on the GoFlex Cinema's hard drive – no computer required.
