**(EDIFACT D97A)**

**VERSION: 1.0**

# INVOIC

## Invoice message

A message claiming payment for goods or services supplied under conditions agreed between the seller and the buyer. The United Nations Standard Invoice Message, with correct data qualification, serves also as the specification for Debit Note and Credit Note messages. Throughout this document, the reference to 'Invoice' may be interpreted as conveying the wider meaning of 'Invoice/Credit Note/Debit Note'.

	UNZ	INTERCHANGE TRAILER	M	1		Used

**Clarification:**

- 1/0010 A service segment starting and uniquely identifying a message. The message type code for the Invoice message is INVOIC. Note: Invoice messages conforming to this document must contain the following data in segment UNH, composite S009: Data element 0065 INVOIC 0052 D  
0054 97A 0051 UN
- 1/0020 A segment by which the sender must uniquely identify the invoice by means of its type and number and when necessary its function.
- 1/0030 A segment specifying general dates and, when relevant, times related to the whole message. The segment must be specified at least once to identify the invoice date. Examples of the use of this DTM segment is: "shipped on date" or "delivery date". The Date/time/period segment within other Segment groups should be used whenever the date/time/period requires to be logically related to another specified data item e.g. Payment due date is specified within the PAT Segment group.
- 1/0110 A group of segments for giving references and where necessary, their dates, related identification numbers, locations, measurements, quantities, free text and monetary amounts, relating to the whole message, e.g. contract information, import or export license information, despatch advice information.
- 1/0120 A segment identifying the reference by its number and where appropriate a line number within a document.
- 1/0200 A group of segments identifying the parties with associated information.
- 1/0210 A segment identifying names and addresses of the parties, in coded or clear form, and their functions relevant to the invoice. Identification of the seller and buyer parties is mandatory for the invoice message. It is recommended that where possible only the coded form of the party ID should be specified e.g. The Buyer and Seller are known to each other, thus only the coded ID is required, but the Consignee or Delivery address may vary and would have to be clearly specified, preferably in structured format.
- 1/0240 A group of segment for giving references only relevant to the specified party rather than the whole invoice.
- 1/0250 A segment identifying the reference by its number and where appropriate a line number within a document.
- 1/0370 A group of segments specifying the currencies and related dates/periods valid for the whole invoice. Currency data maybe omitted in national applications but will be required for international transactions.
- 1/0380 A segment identifying the currencies required in the invoice e.g. the invoice currency. A rate of exchange may be given to convert a reference currency into a target currency.
- 2/1030 A group of segments providing details of the individual invoiced items. There must be at least one occurrence of Segment group 22 within an invoice, but not necessarily in a credit note or a debit note. This Segment group may be repeated to give sub-line details.
- 2/1040 A segment identifying the line item by the line number and configuration level, and additionally, identifying the product or service invoiced. Other product identification numbers, e.g. Buyer product number etc., can be specified within the following PIA segment.
- 2/1080 A segment identifying the product quantities e.g. invoiced quantity.
- 2/1180 A group of segments specifying any monetary amounts relating to the products and when necessary a currency.
- 2/1190 A segment specifying any monetary amounts relating to the product, e.g. item amount, insurance value, customs value.
- 2/1260 A group of segments identifying the relevant pricing information for the goods or services invoiced.
- 2/1270 A segment to specify the price type and amount. The price used in the calculation of the line amount will be identified as 'Price'. Indication of "net price" or "gross price" can be given in 5387 "Price type qualifier".
- 2/1320 A group giving references and where necessary, their dates, relating to the line item.
- 2/1330 A segment identifying the reference by its number and where appropriate a line number within a document.
- 2/1480 A group of segments specifying tax related information for the line item, and when necessary, the location(s) to which that tax information relates.
- 2/1490 A segment specifying a tax type, category and rate, or exemption, relating to the line item.
- 2/1500 A segment specifying the amount for the identified tax/fee.
- 2/2090 A mandatory service segment placed before the first user segment in the summary section to avoid segment collision.
- 2/2110 A group of segments giving total amounts for the whole invoice and - if relevant -detailing amounts pre-paid with relevant references and dates.
- 2/2120 A segment giving the total amounts for the whole invoice message such as message monetary amount, message line item total amount, amount subject to payment discount, amount subject to tax, alternative currency total amount, total additional amount, sub-total amounts prepaid, total amount prepaid.
- 2/2160 A group of segments specifying taxes totals for the invoice.
- 2/2170 A segment specifying the tax type to be summarized.
- 2/2180 A segment specifying the summary amount for the tax specified.
- 2/2190 A group of segments specifying allowances and charges summary totals for the invoice.
- 2/2240 A service segment ending a message, giving the total number of segments in the message and the control reference number of the message.
