

LYVEDRIVE™

MOBILE STORAGE SYSTEM
BUILT FOR YOUR DATASPHERE

Today's data is alive,
intelligent, and requires
agility to activate.

Leverage customized
innovation to manage
exponential data growth.

Lyve Drive Product Line

From high-performance cards to massive mobile arrays, our mobile system is designed to fit any data workflow.

We've engineered a revolutionary system of modular solutions that help you efficiently move data around your enterprise, cloud, and edge.

Our Lyve Drive solutions are available in a variety of storage options and configurations that are simple and reliable for emerging datasphere environments.

Lyve Drive Product Line

Our portfolio of data storage solutions saves and protects a large amount of humanity's data. This motivates us to continue creating simple, secure, and efficient solutions that drive your datasphere.

SIMPLE

Plug in our solutions and they will work in your environment. Our interfaces are easy to understand and use, regardless of your technical expertise.

SECURE

Use industry-standard verifications to confirm data integrity. Our authenticated firmware and at-rest encryption provide assurance without compromise.

EFFICIENT

Quickly extract and activate the value of your data with faster speeds. Our products give you super fast access to your data without the fear of interruptions or costly delays.

Begin With Endpoints

Connect all endpoints and ingest their data into your datasphere with a wide range of endpoint storage, software, and connectivity options.

Mobile Meets Modular

Leverage the power of mobility and modularity by using products that are designed to fit into all of the various locations of your datasphere.

Pair With Larger Storage Arrays

Surpass traditional edge capacity and performance limitations by using a familiar mobile form factor that is small enough to fit on your desk.

Seamless Data Center Integration

Choose expertly crafted data storage solutions that are engineered to fit each and every data center environment in your enterprise.

Lyve Drive Mobile System

From edge to core, our modular portfolio allows you to customize any data workflow by utilizing individual components.

HOW IS

LYVEDRIVE[™]

BUILT FOR **YOUR DATASPHERE?**

Media and Entertainment

The media and entertainment (M&E) industry consistently generates more data than any other, with more than 500 *original* scripted series in production each year in the United States alone.

HIGHER RESOLUTIONS

Each series generates roughly 14TB of digitally recorded content every week, ranging in resolution from 2K to 5K. With 8K on the horizon, a single series could generate 100TB/week.

NO COHESIVE SOLUTION

Each series uses different hardware and software with conflicting procedures and policies. This results in higher ownership and run costs due to varying contracts, training fees, and the like.

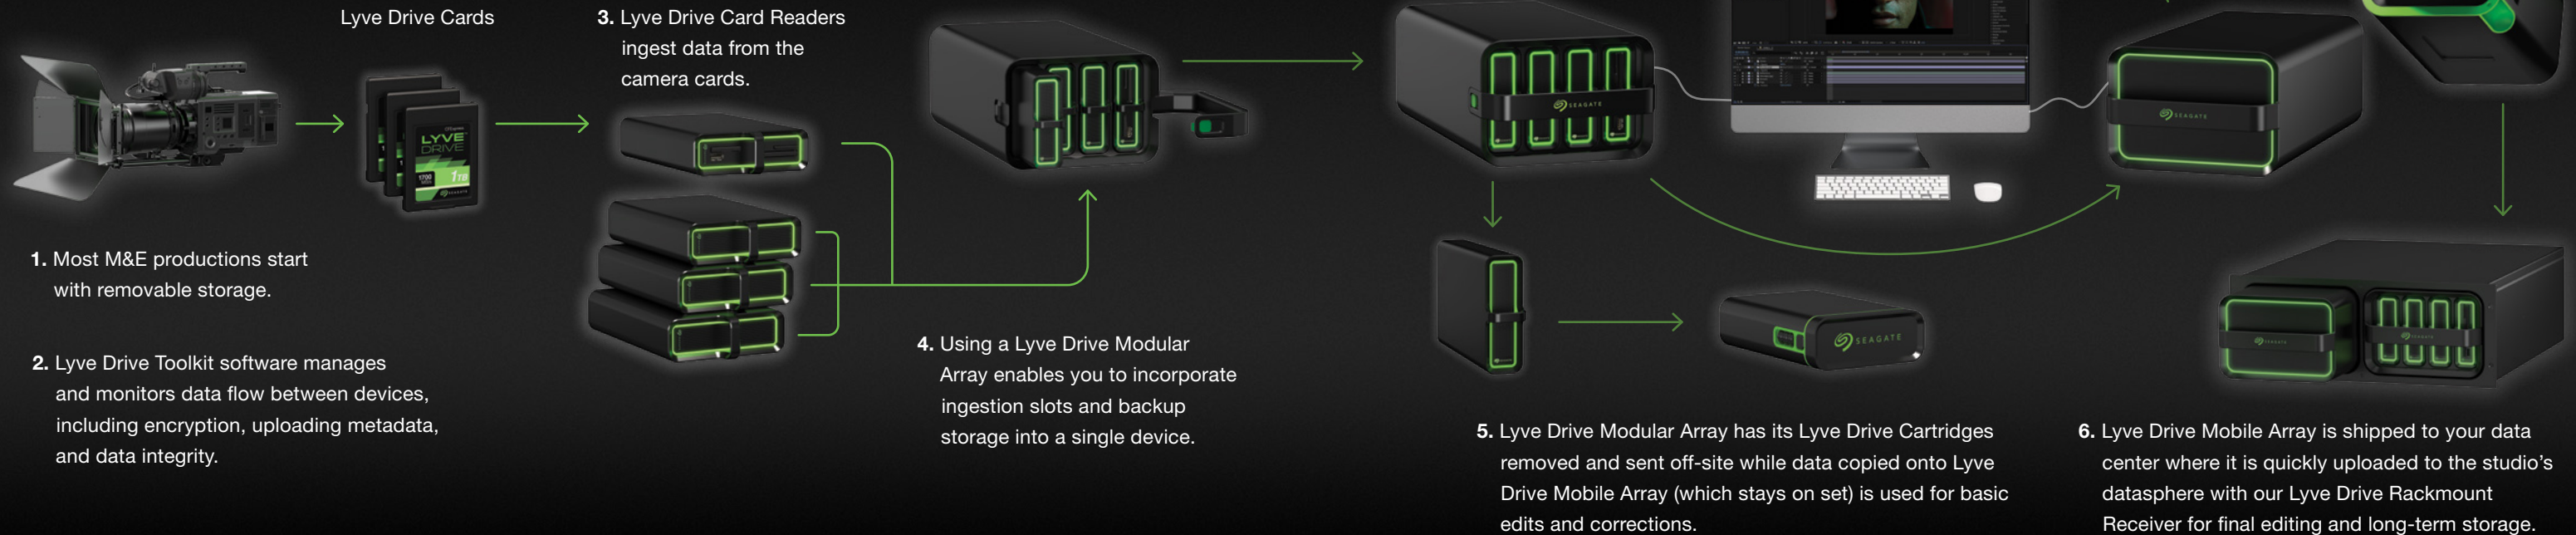

BRING ORDER TO CHAOS

Without a unified data experience, it's impossible to secure all production content and efficiently manage data transport. The potential cost of these inefficiencies and risks is astronomical.

Media and Entertainment Workflow

Productions can standardize data movement workflows using multiple solutions.

Autonomous Car Training

Autonomous cars drive millions of miles to establish learning algorithms and virtual simulations.

THE LONG ROAD

Each car must offload its data after each trip, which creates extremely large amounts of data.

DIVERSITY OF DATA

Offloads contain multiple video streams, compute and sensor logs, LiDAR, radar, and more.

RINSE AND REPEAT

Each car's data storage device is removed and inserted into a rack for recognition, authorization, and transfer to the localized storage before heading out for more data.

Autonomous Car Training Workflow

During the test phase, all data is saved for ongoing algorithm training.

Lyve Drive Mobile Systems

Lyve Drive Cards

High-capacity, high-performance flash cards that are perfect for IoT data collection.

Lyve Drive Card Reader

A portable solution for ingesting the most popular endpoint data sources.

Lyve Drive Cartridge

High-capacity, portable single-drive solution with U.2 interface.

Lyve Drive Thunderbolt 3 Connector

Connect to any interface or existing system with this versatile device.

Lyve Drive Mobile Array

This sealed, high-performance, 6-bay array is ruggedized and easy to transport.

Lyve Drive Modular Array

This high-performance, 4-bay array allows you to build what you need for your workflow.

Lyve Drive Shuttle

Autonomous data storage and transport solution with network connectivity and touchscreen technology.

Lyve Drive Cartridge Mount Lyve Drive Array Mount

Easily affix storage products to a variety of surfaces in the field and at the edge.

Lyve Drive Array Shipper Lyve Drive Cartridge Shipper

Designed for secure, durable transport of cartridges and arrays.

Lyve Drive Rackmount Receiver

This high-performance datasphere ingestion hub will mount two arrays to your data center fabric.
