

Business Storage

4-BAY NAS
Data Sheet

Centralize your storage and backups with a complete network storage solution and private cloud for small businesses.

The Seagate® Business Storage 4-bay NAS is a complete network storage solution designed to keep businesses with up to 50 employees productive by creating a secure private cloud. With the included backup software for Windows®, Time Machine® compatibility and RAID protection, it's simple to keep your critical business files protected. The Business Storage 4-bay NAS creates a shared space for your colleagues and clients to collaborate by storing files centrally. With the Global Access™ service, you can stay connected to your business from anywhere in the world with free apps for iPhone®, iPad® and Android® devices.

The Business Storage 4-bay NAS features a Web interface where clients and coworkers can securely download and upload large files. Unlike typical cloud storage services, you retain complete ownership and control of your data. Plus, it is so easy to set up and use that there's no need to hire an IT professional.

The Business Storage 4-bay NAS comes with everything your business needs to ensure complete protection for all the files stored on PC and Mac® computers in your business. The included BlackArmor® backup software for Windows® PCs will take the hassle out of backing up multiple computers by automating the process. The software helps you protect data by backing up not only the files you store, but also the programs, settings, email and even the operating system on your local PCs. With this level of protection, you can restore the entire hard drive on a PC that has suffered a hardware failure. By supporting Time Machine® software, the Business Storage 4-bay NAS offers the same level of data protection for all the Mac computers in your business.

Business Storage

4-BAY NAS

The Business Storage 4-bay NAS includes government-grade hardware encryption technology that helps protect data stored on the NAS. When you access files remotely, the 4-bay NAS also helps protect your data-in-flight with SSL/TLS, the same technology that secures your information when banking online.

The 4-bay NAS features a Universal Storage Module (USM™) slot that makes it incredibly simple and cost-effective to create off-site backups of your data. Start by docking a Seagate® Backup Plus portable drive in the USM slot. With a touch of a button, you can transfer large files at

speeds up to 3x faster than USB 2.0. Undock your portable drive and data, and you're ready to take your files with you or to a secure, off-site location.

The USM slot is also convenient for photographers, videographers and other professionals who routinely bring back large files from the field. Use a Backup Plus portable drive throughout the day and when you're back at the office, slide the portable drive into the USM slot and—with a touch of a button—all of your work is transferred to a designated folder on the 4-bay NAS.

Specifications

Retail Packaging	Product Dimensions	Box Dimensions	Master Carton Dimensions	Pallet Dimensions
Length (in/mm)	14.8/377	14.9/379	19.7/500	47.3/1200
