Fast

SSD PORTABLE DRIVE

Data Sheet

Seagate Backup Plus Fast, external SSD, portable performance

The Seagate® Backup Plus Fast SSD offers the ultimate performance in a portable solid state drive. It is up to 4x faster than a standard portable hard drive and up to 2x faster than performance USB flash drives. Utilizing an SSD to reach transfer speeds of up to 430MB/s, the drive takes full advantage of the included USB 3.0 interface. The blazing transfer speeds help relieve any system burden and allow superb handling of HD video. Only slightly thicker than a pencil, the sleek and durable metal design allows you to slip the drive into your pocket or backpack so that you always have a copy of files and projects handy. Since SSDs do not require file indexing, files can be found instantaneously to help reduce downtime and increase productivity. And because the drive is powered entirely by the USB port, no external power supply is required. Take this drive anywhere and be up and running in a snap.
