

# EVault Portal

## Data Sheet

### Key Benefits

- **Manage**—More easily manage day-to-day backup and recovery operations
- **Monitor**—Check the health of your backup environment
- **Analyze**—Troubleshoot failed backups with greater speed and accuracy
- **Report**—Promptly generate and customize detailed reports
- **Collaborate**—Engage with colleagues or EVault Support to resolve issues

### Streamline your backup and recovery operations with social tools.

The EVault® Portal makes backup management and reporting easier and more intuitive by transforming your data protection operations into a simple and collaborative experience. Built on a social platform that models the way people, systems, and data connect, the EVault Portal enables EVault Cloud Backup Service\* customers to manage their most frequently used backup and recovery functions from a simple web interface. It is also a social collaboration tool that enables your IT team to work better together, and to quickly access best practices and recommendations from EVault Support and the user community.

### Get a Bird's Eye View of Your Backup Landscape

Take advantage of the EVault Portal's intuitive dashboard to manage, monitor, and report on the overall health of your backup environment. View your entire infrastructure—from headquarters to remote and branch offices—including protected servers and EVault cloud-connected™ storage.

### Troubleshoot Issues Faster and with Greater Insight

Swiftly drill down to the root cause of failed backups or system issues. Immediately analyze error codes using hyperlinks to the EVault Support knowledge base.

### Intelligent Reporting Made Simple

Utilize the enhanced reporting features within the EVault Portal to rapidly generate a variety of reports with actionable intelligence about your backup environments. Run commonly used reports such as backup details and storage usage summaries, customize reports to your business needs, or schedule reports to analyze system metrics over time. You can then save reports in multiple formats and email them to other stakeholders and decision makers.

# EVault Portal

## Collaborate in Real Time to Work Better and Faster

The EVault Portal is a social platform that helps IT teams work smarter together—just think of it as Facebook for your IT team. For example, your IT administrator can collaborate in real time with your VM or Exchange administrator to troubleshoot an issue or analyze storage usage.

The EVault Portal makes backup management and reporting easier and more intuitive.
