

Bigfoot™

Configuration Guide

CMOS Values

Capacity	1280MB	2110MB	2550MB
Cylinders	2492	4092	4994
Heads	16	16	16
Sectors	63	63	63
Write Precomp	65535	65535	65535
Landing Zone	2492	4092	4994

Note on Write Pre-compensation:

The Quantum Bigfoot does not require write pre-compensation, your CMOS setting should be set to reflect that this feature is not enabled. If the setting of 'none' is not present, the value 65535 is a number that the BIOS will accept to disable this feature.

Jumper Settings

Single Drive	DS only
Master Drive	DS only
Slave Drive	No jumpers
