Data Sheet

Small drive, large storage for your digital life on your computer and mobile devices

The Seagate® Backup Plus portable drive for Mac® offers the mobility of a portable drive with the high capacity of a desktop drive. Under a sleek metal design lies 4TB of storage—twice the capacity of comparable 2.5-inch portable drives. This gives you the space to store your movie, music and photo collections—and bring them with you wherever you go.

The drive is formatted for Mac and compatible with Time Machine backup software right out of the box. High-speed USB 3.0 and 2.0 connectivity offers plug-and-play functionality on your Mac. Install the HFS+ drive for PC, and you can use the drive interchangeably between Windows and Mac computers without reformatting.

Via the Seagate Dashboard software, you are provided with tools for mobile, cloud and social media backup. Install the free Seagate Mobile Backup app on an iOS or Android mobile device to back up all of the pictures and videos from the device to your external drive or the cloud.
