Data Sheet

Upgrade your Backup Plus Desktop drive to increase performance.

Thunderbolt technology is a revolutionary interface supporting high-resolution display and high-performance data devices through a single port. At 10Gbps, the Thunderbolt adapter is up to 20x faster than USB 2.0 and up to 12x faster than FireWire® 800. Transferring high-definition movies and other large files now takes seconds versus minutes when compared with older interface technologies.

Taking advantage of the Backup Plus design, the Seagate Thunderbolt Desktop adapter turns any Backup Plus Desktop drive into a blazing-fast Thunderbolt device for your compatible computer. With dual Thunderbolt ports, it can support daisy-chaining up to 6 Thunderbolt devices, minimizing clutter on your desktop.

Connect multiple devices to turn your computer into a powerful workstation with just one interface.
