Data Sheet

High-speed backup for your digital life on your computer, mobile devices and the cloud

The Seagate® Backup Plus Fast portable drive offers up to 2× the capacity and performance compared to other 2.5-inch portable drives. The metal design protects 4TB of storage, so you can carry your movie, music and photo collection wherever you go. The drive also optimizes the speed of the fast USB 3.0 interface with transfer speeds up to 220MB/s—giving you the ability to quickly transfer files, and work on graphic or video projects directly from the drive.

The drive is fully USB powered and does not require an external power supply—allowing you to carry as many videos, songs and photos as in a 3.5-inch drive in this compact portable drive. Install the NTFS driver for Mac®, and you can use the drive interchangeably between Windows and Mac computers without having to reformat.

Via the Seagate Dashboard software, you are provided with tools for local, mobile, cloud and social media backup. Run a one-click backup or schedule an automatic backup plan to protect your files in your Backup Plus Fast portable drive at your convenience. Install the free Seagate Mobile Backup app on an iOS or Android mobile device to back up all of the pictures and videos from the device to your external drive or the cloud.
